4MP STARLIGHT 30' IR VANDALPROOF WDR WEDGE DOME IP SECURITY CAMERA

Wide angle lens offers a 109° field of view to cover large areas

Monitor and protect your home or business with the Alibi 4.0 Megapixel 30' IR Vandalproof WDR Outdoor Wedge Dome IP Security Camera.

The network IP camera features a 2.8 mm fixed lens with 109° field of view, along with a 1/2.5" CMOS progressive-scan image sensor that delivers up to 4.0 megapixel resolution at 30 frames per second (fps).

The 4.0 megapixel IP security camera features integrated IR LEDs that enable the camera to see up to 30' in the dark. The camera features Smart IR, an Advanced Infrared Technology, which reduces over-exposure of the IR LED at the center of the image without washing out the subject at close range.

The megapixel IP camera is equipped with true day/night (ICR) which captures sharp, detailed color images during the day and black and white images in low light. 120db true wide dynamic range (WDR) and 3D digital noise reduction (3D-DNR) produce exceptional image quality with less noise in variable and low light conditions.

The IP dome camera features a true 3-axis gimbal that simplifies installation, and provides flexible mounting and camera positioning. The tri-axis gimbal enables you to mount the dome camera virtually anywhere (wall or ceiling), and position it at any angle to achieve the desired field-of-view.

The camera's IP66 weather-rated enclosure provides protection from particles such as dust and sand, as well as harsh weather conditions, including rain and snow. The vandal-resistant camera's enclosure is also IK08 impact resistant, which provides protection against physical impact.

The megapixel IP dome camera supports up to 128GB micro SD cards (sold separately). The camera can be powered via 802.3af PoE or 12 Vdc power supply, and is ONVIF Profile S compliant for greater device compatibility and ONVIF Profile G approved.

This camera also features an event log, and event notification, along with email notification.

The free Alibi Witness mobile app enables you to view your live and recorded video remotely—from anywhere, from your Android or iOS mobile device.
